

How to Use: Money Blocks

Overview

Money Blocks are interactive manipulatives that help Kindergarten–3rd grade students build real-world money skills.

Key Learning Goals

- Recognize and name common U.S. coins and bills
- Understand buying, selling, and using money in transactions
- Count and combine coins and bills to make exact amounts
- Practice making change through real-world scenarios

How to Use

These lessons should be completed at your student's pace.

Lessons are non-sequential, so you can hop into any lesson as needed, provided that your student meets the prerequisites for the lesson.
